(54) COLD WRAPPING STUFF

(57)Abstract:

PURPOSE: To keep beverages cool for 2 to 3 hours when carrying them during hiking or going out; to wrap a can from a vending machine in order to insulate and keep out heat for the time being.

CONSTITUTION: The wrapping stuff consists of the package cloth with the outermost layer being an outer frame 4, a heat insulator 3, an ultra-precise fibrin material 2 and the innermost layer consisting of a water absorption paper 1 having polymers in the middle.

The wrapping stuff is a wide cloth wrapping a can such that it can be adapted with Magictape (Registered Trademark) according to the varying diameter of the can. The wrapping stuff uses polymers so that it achieves heat insulation and keeps the object cool for 2-3 hours more.
